

TAMER'S BOND

DIGIDESTINED ADVENTURE

Season 1 Module

Eight Kids. Eight Crests. One Digital World.

TAMER'S BOND

DigiDestined Adventure

Season 1 Module

Playtest Draft v0.2

About This Book

DigiDestined Adventure is the first season module for Tamer's Bond. It introduces the class trees, expanded rules, and item compendium built around the world and characters of the original DigiDestined story.

What

's Inside Part 1: Classes — Eight class trees, one for each of the original DigiDestined. Any Tamer can take any class. Part 2: Rules — Expanded digivolution rules including Warp Digivolution and DNA Digivolution. Part 3: Items — The full Season 1 item compendium including the Digivice, Crests, gear, supplies, and food.

Familiarity with the Tamer's Bond Core Rulebook is assumed throughout. Core item rules, stat rules, and combat rules are not repeated here.

PART 1

Classes

About Season 1 Classes

The DigiDestined Adventure module introduces eight class trees, each inspired by one of the original DigiDestined — their personalities, their crests, and their approach to the Digital World.

Classes are not locked to a specific character concept or crest choice. Any Tamer can take any class as long as they meet the stated requirements.

Class Rules at a Glance

Any Tamer can take any class if they meet the requirements. EXP spent on classes comes from the same pool as stats and skills — every purchase is a real tradeoff. You may hold abilities from multiple classes simultaneously. Lower rows have higher requirements. You must purchase at least one ability in a row before accessing the next. All EXP costs and requirements are playtest values — subject to change.

Tai — Crest of Courage

The reckless leader who charges in before anyone else and somehow makes it work. Tai Tamers live on the edge of corruption and turn crisis into victory. Where others plan, Tai acts. Where others hesitate, Tai digivolves.

Entry Requirement

To unlock the first row: Courage rank 3

— Row 1 —

Reckless Push

300 EXP Requires: Entry requirement met* When you force a digivolution and the roll succeeds, your Digimon gains +3 to their next attack roll this round. Living dangerously pays off.

Lead From the Front

300 EXP Requires: Entry requirement met* Once per encounter you may use Call Out as a Free Action on another character's turn, not just your own. Your voice carries even when it is not your moment.

— Row 2 —

Burning Courage

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* When your Digimon is digivolved above their Default Stage, they deal +2 bonus damage on every attack. The higher the risk, the harder they hit.

No Retreat

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* When your Digimon hits 0 HP above Default Stage, before the cascade triggers you may spend 5 Hope to keep them at 1 HP and maintain their current stage until the end of this round. They are still in the fight.

— Row 3 —

Push the Limit

800 EXP Requires: Both Row 2 abilities, Courage rank 6* Your Digimon may now digivolve up to 3 stages above Default Stage instead of the normal 2 stage maximum. The Hope costs and corruption rules still apply. Some limits were made to be broken.

Matt — Crest of Friendship

The lone wolf who protects through strength and distance. Matt Tamers are fiercely independent — they do not need backup, they ARE the backup. Cold on the outside, absolute in a crisis.

Entry Requirement

To unlock the first row: Friendship rank 3

— Row 1 —

Solo Run

300 EXP Requires: Entry requirement met* Once per encounter when your Digimon is the only Digimon currently active on your side, they gain +2 to all attack rolls and +2 damage. You don't need a team to be dangerous.

Pack Bond

300 EXP Requires: Entry requirement met* Once per encounter you may use your Free Action to grant an ally Digimon within 3 spaces +3 to their next damage roll. You protect what matters to you, even if you won't say it out loud.

— Row 2 —

Cold Front

500 EXP Requires: At least 1 Row 1 ability, Friendship rank 4* Once per encounter when your Digimon is attacked, you may use your Free Action to grant them +4 to their Reliability for that attack only. The wall goes up before the hit lands.

Rival

's Fire 500 EXP Requires: At least 1 Row 1 ability, Friendship rank 4* When an ally Digimon is reduced to 0 HP in the same encounter, your Digimon gains +4 to their next attack roll and +4 damage on that attack. Loss makes them dangerous.

— Row 3 —**I Work Alone**

700 EXP Requires: Solo Run, Friendship rank 5* Solo Run now activates whenever your Digimon acts before any allied Digimon has taken a turn this round, even if other Digimon are present. First in is always alone.

Stand Together

700 EXP Requires: Pack Bond, Friendship rank 5* Pack Bond can now target any ally Digimon anywhere on the battlefield, not just within 3 spaces. When you decide to protect someone, distance does not matter.

Warp Digivolution

700 EXP Requires: At least 1 Row 2 ability, Friendship rank 5* Your Digimon can now digivolve two stages at once in a single Basic Action, skipping the stage in between. Pay the combined Hope cost of both stages minus 2 to initiate. The per-turn maintenance cost is also reduced by 2. Warp Digivolution cannot be forced — the full cost must always be paid. All other digivolution rules apply normally. See Part 2: Rules for full details and examples.

— Row 4 —**The Wall**

1000 EXP Requires: Both Row 3 abilities, Friendship rank 7* Once per session when an attack would reduce an ally Digimon to 0 HP, you may declare The Wall before the damage is applied. The damage from that attack is divided evenly between the ally Digimon and your Digimon — both take half, rounded down. The ally Digimon always survives with a minimum of 1 HP no matter how the numbers work out. Your Digimon takes their half normally and triggers their own cascade if they reach 0 HP. Example: an attack deals 10 damage to an ally. Both your Digimon and the ally take 5. The ally survives at 1 HP or higher. Your Digimon takes 5 and may cascade if they cannot absorb it.

Sora — Crest of Love

The caretaker who holds the group together without anyone noticing. Sora Tamers lead through care and presence — they know when someone is breaking before that person knows it themselves.

Entry Requirement

To unlock the first row: Love rank 3

— Row 1 —

Steady Hands

300 EXP Requires: Entry requirement met* When you make a Recovery or Mend check, add your Love rank as a bonus to the roll on top of the normal skill formula. Care given with precision goes further.

Read the Room

300 EXP Requires: Entry requirement met* At the start of each encounter you may make a free Radar check (DN 10). On a success the GM tells you one piece of information about the battlefield — a hidden enemy, a terrain hazard, or a weak point.

— Row 2 —**Rally Cry**

500 EXP Requires: At least 1 Row 1 ability, Love rank 4* As a Basic Action, choose one ally Digimon. They immediately remove one stack of any status effect currently affecting them. This can be used as many times per encounter as you have Basic Actions to spend. Your care cuts through the noise.

Protective Instinct

500 EXP Requires: At least 1 Row 1 ability, Love rank 4* When an ally within 2 spaces is targeted by an attack, you may use your Free Action to move up to 2 spaces toward them as an off-turn Free Action. This triggers before the hit resolves. You have to be there first.

— Row 3 —**Field Medic**

700 EXP Requires: Steady Hands, Love rank 5* When you successfully use Recovery during a short rest, both your Tamer AND your Digimon restore HP equal to double the roll result instead of the normal amount. Rest under your care actually means something.

Never Too Late

700 EXP Requires: Rally Cry, Love rank 5* Once per session when a Digimon in your party would enter egg state, you may immediately spend 10 Hope to prevent it. That Digimon instead stabilizes at In-Training stage with 1 HP. You always find a way to bring them back.

— Row 4 —**Heart of the Team**

1000 EXP Requires: Both Row 3 abilities, Love rank 7* Once per session at the start of your turn you may activate Heart of the Team. All allied Tamers and Digimon restore HP equal to your Love rank. This does not cost an action — it costs everything you have left to give.

Izzy — Crest of Knowledge

The analyst who has already solved the problem before anyone else knew there was one. Izzy Tamers turn information into advantage — every battle is a puzzle and every enemy is a data set waiting to be cracked.

Entry Requirement

To unlock the first row: Knowledge rank 3

— Row 1 —

Data Scan

300 EXP Requires: Entry requirement met* Once per encounter as a Basic Action, choose one enemy. You learn their Attribute, Element, and one combat stat of your choice. Information is the first weapon.

Tactical Override

300 EXP Requires: Entry requirement met* Once per encounter as a Free Action on your turn, you may move one allied Digimon up to 2 spaces in any direction before their turn begins. They go where the plan needs them.

— Row 2 —

Exploit Weakness

500 EXP Requires: Data Scan, Knowledge rank 4* When your Digimon attacks an enemy you have already scanned this encounter, they deal +Knowledge rank bonus damage on that attack. Understanding the target is half the fight.

Calculated Strike

500 EXP Requires: At least 1 Row 1 ability, Knowledge rank 4* Once per encounter when your Digimon misses an attack, you may spend 3 Hope to reroll the attack roll and take the higher result. Data corrects for error.

— Row 3 —

Full Analysis

700 EXP Requires: Data Scan and Exploit Weakness, Knowledge rank 5* Data Scan now reveals ALL of the target's combat stats in addition to their Attribute and Element. Every number, every weakness, every opening — laid bare.

Digimon Encyclopedia

700 EXP Requires: At least 1 Row 2 ability, Knowledge rank 5* Once per session you may declare that your character has researched a specific Digimon type before this encounter. You automatically know their Attribute, Element, and two combat stats without spending a scan action.

— Row 4 —

Prodigious

1000 EXP Requires: Both Row 3 abilities, Knowledge rank 7* Once per encounter after an enemy takes an action, you may use your Free Action to predict their next move. The GM tells you one of the following: which target they will attack next, which move they plan to use, or whether they intend to move. You can only predict one thing per activation.

Mimi — Crest of Sincerity

The unexpected force. Mimi Tamers seem soft until the moment they are not. She complains loudly, cares deeply, and somehow ends up being exactly what the situation needed. Her path branches — she can channel her sincerity through charm, through resilience, or through pure heart.

Entry Requirement

To unlock the first row: Sincerity rank 3

— Row 1 — Choose your path —**Bright Personality**

300 EXP Requires: Entry requirement met — Friendship path* Once per encounter as a Free Action, choose one enemy NPC or Digimon. Make a Broadcast check DN 12. On a success they are distracted by your presence — they take -2 to their next attack roll. You have that effect on people.

Harder Than I Look

300 EXP Requires: Entry requirement met — Sincerity path* Whenever your Digimon takes damage that would reduce them to below half their max HP, they gain +2 to all damage rolls until the end of the round. Getting hit just makes them angry.

Pure Heart

300 EXP Requires: Entry requirement met — Love path* Once per encounter as a Free Action you may attempt to calm one non-boss enemy Digimon. Make a Tame check DN 14. On a success that Digimon skips their next action. You see something good in everyone.

— Row 2 — Follows from your Row 1 choice —**Center of Attention**

500 EXP Requires: Bright Personality, Friendship rank 4* Bright Personality now affects all enemies within 3 spaces of the target, not just one. When Mimi walks into a room, the whole room notices.

Won

't Stay Down 500 EXP Requires: Harder Than I Look, Sincerity rank 4* Once per encounter when your Digimon would trigger the cascade at Default Stage, you may spend 8 Hope to have them stay at 1 HP with their Default Stage intact. They are not done yet.

I Believe In You

500 EXP Requires: Pure Heart, Love rank 4* Once per session as your Basic Action, choose one allied Digimon. They immediately restore HP equal to your Sincerity rank x 3 and remove all status effects. Your belief in them is not abstract — it heals.

— Row 3 —**The Mimi Effect**

800 EXP Requires: Any two Row 2 abilities, Sincerity rank 6* Once per session at the start of your turn you may spend 5 Hope to activate The Mimi Effect. Until the start of your next turn all allied Digimon deal +3 damage and all enemy Digimon take -2 to attack rolls. Nobody expected this. That was always the point.

Joe — Crest of Reliability

The one who actually prepared. Joe Tamers are anxious, methodical, and absolutely the person you want next to you when everything goes wrong. While others improvise, Joe already has a plan — and a backup plan — and a backup for the backup.

Entry Requirement

To unlock the first row: Reliability rank 3

— Row 1 —**Always Prepared**

300 EXP Requires: Entry requirement met* At the start of each session you may declare one piece of equipment your character happened to pack. The GM must approve it — it cannot be a weapon, rare Digital World item, or anything that would give a major combat advantage. The declared item must be used this session — it cannot be sold, traded, or carried forward.

Field Dressing

300 EXP Requires: Entry requirement met* Once per encounter as your Basic Action, make a Recovery check DN 10. On a success restore HP to any one target equal to your Recovery roll result. This can be used on Digimon.

— Row 2 —**Triage**

500 EXP Requires: Field Dressing, Reliability rank 4* Field Dressing can now target two characters in the same action. Split the healing however you choose between the two targets. You assess, you prioritize, you act.

Calculated Risk

500 EXP Requires: At least 1 Row 1 ability, Reliability rank 4* Once per encounter before any roll is made, you may declare Calculated Risk. You spend 2 Hope and take -2 to the roll but if you succeed the effect is doubled — double healing, double duration on a status effect, double damage. You ran the numbers. You are confident.

— Row 3 —

Emergency Protocol

700 EXP Requires: Triage, Reliability rank 5* Once per session when any allied Digimon triggers the cascade, you may immediately make a Recovery check DN 14 as a Free Action off-turn. On a success that Digimon stabilizes one stage higher than the cascade result. You always have a contingency.

Steady the Line

700 EXP Requires: At least 1 Row 2 ability, Reliability rank 5* At the start of each encounter before turns begin, you may spend your Free Action to grant all allied Digimon temporary HP equal to your Reliability rank. It is not much but it is one more hit they can take.

— Row 4 —

The Backup Plan

1000 EXP Requires: Both Row 3 abilities, Reliability rank 7* Once per session when the encounter looks lost — all allied Digimon are at Default Stage or below, or two or more are in egg state — you may activate The Backup Plan as a Free Action. All egg-state Digimon immediately return at In-Training stage with 1 HP. All Digimon at In-Training or Rookie gain temporary HP equal to 10. You planned for the worst. You always plan for the worst.

TK — Crest of Hope

The miracle worker. TK Tamers seem like the weakest link until the moment they are the only thing standing between victory and total collapse. Hope is not a stat you raise — it is a resource you protect, nurture, and share. TK Tamers turn Hope into something the rulebook did not account for.

Entry Requirement

To unlock the first row: Hope pool of 55 or higher (achieved by having any crest stat at rank 5 or higher)

Note on the Updated Hope System

TK's class tree has been updated alongside the v0.3 Hope Pool formula. The new Hope Pool values are significantly larger than before — reaching 200 at rank 10. TK's abilities have been redesigned to scale with the new pool sizes rather than using flat numbers. Flat Hope bonuses have been replaced with percentage-based or pool-relative values so TK's power grows naturally with character investment.

— Row 1 —

Reservoir

300 EXP Requires: Entry requirement met* Your Hope pool increases by 10% of its maximum permanently, on top of the normal formula. This bonus scales automatically as your Hope pool grows through stat investment. Example: Hope pool is 80 at rank 6. Reservoir adds 8, giving you 88 total. At rank 10 with a pool of 200, Reservoir adds 20, giving you 220 total. You carry more than most people think possible.

Last Light

300 EXP Requires: Entry requirement met* Once per encounter when your Hope hits 0 and your Digimon would revert, you may instead keep them at their current stage for 1 additional round at no Hope cost. Just one more moment. That is all you need.

— Row 2 —**Share the Light**

500 EXP Requires: Reservoir* Once per encounter as a Basic Action, transfer any amount of Hope from your pool to any allied Tamer of your choice. There is no limit on how much you can transfer in a single use — give as much as the moment demands. Their Digimon does not revert. You gave them what they needed. Note: This costs your Basic Action. Use it when sustaining an ally matters more than your own action this turn.

Miracle Roll

500 EXP Requires: Last Light* Once per session when any die roll in the encounter results in a natural 1 — a critical failure — you may spend Hope equal to 10% of your current maximum Hope pool (rounded up, minimum 5) to reverse it completely. The roll is instead treated as a natural 20 — a critical hit or critical success, whichever applies. Not a save. A miracle. Example: At rank 7 with a Hope pool of 105, Miracle Roll costs 11 Hope to activate.

— Row 3 —**Beacon**

700 EXP Requires: Share the Light, Hope pool of 80 or higher* Once per session at the start of your turn you may declare Beacon. Until the end of the encounter all allied Tamers pay 2 fewer Hope per turn to maintain their Digimon's digivolution stage (minimum 0). Beacon does not stack — if another Tamer's Beacon is already active you cannot activate yours until theirs ends. The light you carry lights others.

Against All Odds

700 EXP Requires: Miracle Roll, Hope pool of 80 or higher* Once per session when your Digimon makes an attack roll with a natural result of 2 through 5, you may spend Hope equal to 15% of your current maximum Hope pool (rounded up, minimum 8) to treat it as a natural 20 — automatic critical hit with double damage. The impossible shot. You believed. It happened. Example: At rank 8 with a Hope pool of 130, Against All Odds costs 20 Hope to activate.

— Row 4 —**Crest of Hope**

1000 EXP Requires: Both Row 3 abilities, Hope pool of 165 or higher* Once per session, at the moment your Hope hits 0 for any reason — before your Digimon reverts — you may activate Crest of Hope. Immediately restore your Hope pool to 50% of its maximum value. Your Digimon does not revert. This Hope is removed at the end of the current encounter and cannot be carried forward. This can be triggered by the per-turn cost, voluntary spending, class abilities, or any other cause. Example: At rank 10 with a Hope pool of 200, Crest of Hope restores 100 Hope. At rank 7 with a pool of 105, it restores 53 Hope. When there is nothing left, TK finds more.

Kari — Crest of Light

The quiet one who changes everything. Kari Tamers do not win fights through power — they win them by making every fight go the way they need it to. She sees the angle nobody else sees, lifts the ally nobody else reaches, and her partner fights at a level that should not be possible yet.

Entry Requirement

To unlock the first row: Love rank 3 OR Friendship rank 3 — each Row 1 ability has its own entry requirement

— Row 1 — Choose your path or take both —

Break Through

300 EXP Requires: Love rank 3* Once per encounter when your Digimon makes an attack that would be reduced by an unfavorable element matchup — meaning the element multiplier is x0.5 — you may declare Break Through before the damage is calculated. Strip the element multiplier entirely. Only the attribute matchup applies to this attack. The angle was always there. She just saw it first.

Cheer

300 EXP Requires: Friendship rank 3* When an ally makes a skill check and fails, you may spend Hope equal to your Friendship rank to boost their result by your Friendship rank. This is declared after the roll is seen but before the GM rules on the outcome. It can turn a failure into a success. You always know exactly what someone needs to hear.

— Row 2 — Requires at least 1 Row 1 ability —

Push Further

500 EXP Requires: Break Through, Love rank 4* Break Through can now be used additional times per encounter by spending 4 Hope per use after the first. Once per encounter is still free. The opening is always there if you are willing to pay for it.

Gatomon

's Legacy 500 EXP Requires: Any 1 Row 1 ability, Champion digivolution unlocked* Your Digimon's Max Default Stage increases by 1 permanently. Their Default Stage can now reach one stage higher than the campaign maximum allows for other Digimon. This represents the natural advantage of a partner who was always further along than anyone expected. This cannot push beyond Mega.

Loud and Clear

500 EXP Requires: Cheer, Friendship rank 4* Once per encounter Cheer is free — it costs no Hope. After that first free use, it still costs Hope equal to your Friendship rank as normal. You always have one perfect moment of belief to give.

— Row 3 — Requires at least 1 Row 2 ability —

Light the Way

700 EXP Requires: Push Further, Love rank 5* Break Through can now be used on any allied Digimon's attack, not just your own. When an ally is hitting into an elemental resistance, you may declare Break Through on their behalf. The Hope cost for additional uses still applies and comes from your pool. You see the opening for everyone.

Rally the Team

700 EXP Requires: Loud and Clear, Friendship rank 5* When you spend Hope to boost an ally's skill check with Cheer and the roll still fails, the Hope cost is fully refunded. You only pay when the boost actually works. This applies to all Hope-cost uses of Cheer, not just the free use. Your belief in someone is not wasted just because the moment was not right.

PART 2

Rules

About This Section

This section contains expanded rules introduced by the DigiDestined Adventure module. These mechanics are not part of the core rulebook — they only apply when the GM has enabled this module for their campaign.

Current Contents

Warp Digivolution: skip a stage, pay a combined cost, unlock through the Matt class tree. DNA Digivolution: two Digimon fuse into a single powerful form with combined stats and moves.

Warp Digivolution

Warp Digivolution allows a Digimon to skip a stage and digivolve two steps at once in a single action. Where normal digivolution climbs one rung at a time, Warp tears through two in a single moment of overwhelming resolve.

Unlock Requirements

Matt class — Row 3 ability Requires at least 1 Row 2 Matt ability Friendship rank 5 Cost: 700 EXP

Warp Digivolution Cost

Pay the combined Hope cost of both skipped stages minus 2. Example: Digivolving from Rookie to Ultimate skips Champion. Normal cost would be Champion (6) + Ultimate (10) = 16. Warp cost = 16 - 2 = 14 Hope to initiate.

Warp Maintenance Cost

Each turn pay the combined stage costs above Default Stage minus 2. Example: Default Stage Rookie, current stage Ultimate. Normal maintenance = Champion (6) + Ultimate (10) = 16 per turn. Warp maintenance = 16 - 2 = 14 Hope per Tamer turn.

No Forcing: Warp Digivolution cannot be forced. You must pay the full Warp cost. The discount is built in — no further reduction is available.

Warp Path	Normal Cost	Warp Cost (initiate)	Warp Cost (per turn)
In-Training → Champion	3 + 6 = 9	7	7

Warp Path	Normal Cost	Warp Cost (initiate)	Warp Cost (per turn)
Rookie → Ultimate	$6 + 10 = 16$	14	14
Champion → Mega	$10 + 15 = 25$	23	23

DNA Digivolution

DNA Digivolution is the fusion of two partner Digimon into a single combined form. The result is not simply one Digimon helping another — it is something new, built from the bond between two partners and two Tamers working as one.

DNA Digivolution Requirements

Two willing Tamers with their Digimon active on the field. Both Digimon must be at the same current stage. At least one of the two Tamers must have the target DNA form unlocked in their Digimon's pool. The DNA form costs the same as any alternate form unlock — see the Core Rulebook. Both Tamers must spend their Basic Action on the same turn to initiate.

DNA Stat Formula

For each crest stat compare both Digimon's total in that stat. The DNA form uses whichever total is higher. Example: Digimon A has total Courage 12. Digimon B has total Courage 8. DNA form Courage = 12. The DNA form does not add the two totals together — it takes the best of each.

DNA HP Rules

DNA max HP = the sum of both Digimon's current HP at the moment of fusion. This cannot exceed the sum of both Digimon's individual max HP values. When the DNA form splits, both Digimon return with HP equal to the DNA form's current HP. Neither Digimon can exceed their own max HP on splitting — cap applies individually.

DNA Move Pool

The DNA form has access to the combined move pools of both Digimon. The DNA form has its own Signature Move unique to that fusion. After DNA Digivolution ends, that Signature Move is permanently added to BOTH Digimon's individual move pools. Stage lock rules still apply.

Hope Cost Rules During DNA

Each Tamer pays their normal Hope cost at the start of their own turn. If either Tamer's Hope hits 0 the DNA form immediately ends. A Tamer with surplus Hope may spend it on the other Tamer's turn to cover their cost and prevent the DNA form from ending. Hope spent this way comes from the covering Tamer's pool. This is declared before the Hope check would fail — you cannot spend after reversion triggers.

Rule	Summary
How to unlock	No class needed — GM confirms compatible species and form
To initiate	Both Tamers spend their Basic Action on the same turn
Stats	Highest value from either Digimon per stat

Rule	Summary
HP on fusion	Sum of both current HP values, no bonus
HP on split	Both Digimon return at DNA form's current HP, capped at individual max
Moves	Combined pool of both Digimon plus unique DNA Signature Move
DNA Signature Move	Permanently added to both Digimon's pools after first use
Hope cost	Both Tamers pay normal per-turn costs — no new cost added
Covering Hope	Either Tamer can spend Hope on the other's turn to prevent reversion
How it ends	Hope runs out, 0 HP, or voluntary Free Action
On ending	Both revert to Default Stage regardless of Hope remaining

PART 3

Items

About Season 1 Items

This section contains items specific to the DigiDestined Adventure module. Core items are documented in Chapter 11 of the Core Rulebook and are not repeated here.

Digivices

Digivice (Season 1)

Type: Digivice Cost: Loot only — cannot be purchased Effect: Must be equipped to digivolve your partner. Glows when wild or hostile Digimon are within 6 spaces — gives advance warning before encounters begin. As a Free Action, scan one visible enemy to learn their Attribute and Element. As a Basic Action, perform a deep scan on one visible enemy to learn their Attribute, Element, and one combat stat of your choice. The Season 1 Digivice supports digivolution up to Ultimate stage. Mega digivolution requires a later Digivice or a special story unlock determined by the GM.

Accessories — The Crests

Crests are passive accessories. Their effect is always active while equipped. The GM decides how Crests are obtained — they may be quest rewards, story milestones, or something a Tamer must earn through character growth.

Crest of Courage

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Courage.

Crest of Friendship

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Friendship.

Crest of Love

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Love.

Crest of Knowledge

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Knowledge.

Crest of Sincerity

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Sincerity.

Crest of Reliability

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +1 Reliability.

Crest of Hope

Type: Accessory Cost: GM determined — Loot / Story reward Effect: +10% to your current maximum Hope Pool (rounded up, minimum +5). Scales with your Hope pool as it grows.

Crest of Light

Type: Accessory Cost: GM determined — Loot / Story reward Effect: Your Digimon's basic attacks deal Light element damage regardless of their natural element.

Clothing

Soccer Jersey

Type: Clothing Cost: 15 Real World Money Effect: +1 to all Blitz skill rolls while equipped. You move like you were born running.

Pink Hat

Type: Clothing Cost: 10 Real World Money Effect: +1 to all Broadcast skill rolls while equipped. People notice you first.

Princess Ballgown

Type: Clothing Cost: 200 Real World Money Effect: +3 to all Broadcast skill rolls while equipped. Impossible to ignore. Also imposes -2 to all Blitz and Ghost skill rolls — it is very hard to sprint or sneak in a ballgown.

Rider

's Helmet Type: Clothing Cost: 60 Real World Money Effect: +2 to all Ironclad skill rolls while equipped. When you take damage that would reduce you to 0 HP, reduce that damage by 3 before applying it.

Lone Wolf Jacket

Type: Clothing Cost: 45 Real World Money Effect: When your Digimon is the only Digimon active on your side, you gain +1 to all skill rolls.

Overpacker

's Satchel Type: Clothing Cost: 25 Real World Money Effect: +2 to all Recovery skill rolls while equipped.

Equipment

Laptop

Type: Equipment Cost: 500 Real World Money Effect: Grants +2 to all Jack In, Decode, and Archive skill rolls while in use. As a Basic Action, attempt to interface with any Digital World system, terminal, or data structure within reach. Cannot be used in active combat without a surface to place it on.

Spyglass

Type: Equipment Cost: 300 DD / 150 Real World Money Effect: As a Free Action, observe a target up to 10 spaces away in detail. Grants +2 to Radar and Trace skill rolls involving distant observation.

Field Tech Satchel

Type: Equipment Cost: 80 Real World Money Effect: If you own a Laptop, using it no longer requires a surface — you can operate it anywhere, including in active combat. Grants +1 to all Modify skill rolls for improvised repairs or assembly.

Whistle

Type: Equipment Cost: 10 Real World Money Effect: As a Free Action, blow the whistle to signal allies. All allied Tamers and Digimon within 10 spaces who can hear it gain +1 to their next roll this round.

Map of the Digital World

Type: Equipment Cost: 200 DD — Digital World merchants, rare Effect: Grants +3 to all Field Ops skill rolls involving navigation in the Digital World. Once per session as a Basic Action, consult the map — the GM reveals one piece of geographic information about the surrounding area.

Fishing Rod

Type: Equipment Cost: 30 Real World Money / 80 DD Effect: Can be used during downtime or a short rest to attempt to catch Digi-Fish from any body of Digital World water. Make a Field Ops skill check — DN 10 for calm water, DN 14 for rough or unusual water. On a success, catch one Digi-Fish.

Supplies

Data Patch

Type: Supply Cost: 200 DD — Digital World exclusive Effect: Restore 8 HP to one Digimon. Cannot be used on Tamers.

Digi-Serum

Type: Supply Cost: 500 DD — Digital World exclusive, rare Effect: Remove ALL status effects from one Digimon at once.

Digi-Mushroom

Type: Supply Cost: 40 DD — Digital World foraging or merchants Effect: When used, roll 1d6: 1-2: Restore 6 HP. 3-4: Restore 10 HP. 5: Restore 15 HP and remove one status effect. 6: Restore HP to full.

Canned Food

Type: Supply Cost: 15 Real World Money Effect: Restore 5 HP to one Tamer. Cannot be used on Digimon. Does not count as a full meal for hunger purposes.

Food**Digital World Fruit**

Tanemon

's Berries Type: Food Cost: Free — found in Digital World / 30 DD at merchants Effect: Counts as a meal for Digimon only. Prevents hunger for the Digimon. Restores 6 HP to the Digimon immediately.

Playtest Notes — v0.2**Changes from v0.1**

Hope Pool formula updated — now uses a non-linear lookup table based on highest crest stat rank (see Core Rulebook v0.3). TK class tree fully redesigned to scale with the new Hope pool values: — Reservoir now grants +10% of max Hope pool instead of a flat +5. — Share the Light now allows transferring any amount of Hope as a Basic Action with no limit. — Miracle Roll now costs 10% of max Hope pool instead of a flat 6. — Beacon now reduces maintenance costs by 2 instead of 1. — Against All Odds now costs 15% of max Hope pool instead of a flat 3. — Crest of Hope (Row 4) now restores 50% of max Hope pool instead of twice highest stat rank. — Entry requirement updated to Hope pool of 55+ (rank 5) to match new formula. — Crest of Hope entry requirement updated to Hope pool of 165+ (rank 9). — Crest of Hope (Accessory) now grants +10% of Hope pool instead of flat +5.

Ongoing Playtest Questions

— Do the class trees feel distinct from each other in play, or do some blur together? — Is Tai's Push the Limit (3 stages above Default) too powerful or does the Hope cost keep it in check? — Does Matt's Warp Digivolution see regular use, or is the Hope cost still too steep? — Does DNA Digivolution feel worth the two-action investment to initiate? — Does the new TK tree feel meaningfully more powerful at high levels than before? — Do the percentage-based Hope costs on TK's abilities feel intuitive at the table? — Is the new Hope pool large enough that forcing digivolution feels like a genuine choice rather than a necessity? — Is the Digi-Mushroom roll table balanced? Does the variance feel fun or frustrating? — Does the Fishing Rod and Digi-Fish loop see actual use at the table? — Is Sukiyaki priced correctly given its strong dual session bonus?

Report findings to the designer.
