

TAMER'S BOND

A NEW DESTINY

Season 2 Module

The Second Generation Rises

TAMER'S BOND

A New Destiny

Season 2 Module

Playtest Draft v0.1

About This Book

A New Destiny is the second season module for Tamer's Bond. It introduces seven new class trees, the Armor Digivolution system, and a full item compendium built around the world of the second DigiDestined generation.

This module stands alone. The DigiDestined Adventure module is not required to use this book. Where content from that book is relevant — such as DNA Digivolution rules — it is noted and referenced clearly.

What

's Inside Part 1: Classes — Seven class trees for the Season 2 cast. TK and Kari have entirely new trees distinct from their Season 1 versions. Part 2: Rules — Armor Digivolution, the new digivolution system introduced in Season 2. Part 3: Items — The full Season 2 item compendium including the D-3 Digivice, Digi-Eggs, new gear, supplies, and food.

Familiarity with the Tamer's Bond Core Rulebook is assumed throughout. Core item rules, stat rules, and combat rules are not repeated here.

PART 1

Classes

About Season 2 Classes

A New Destiny introduces seven new class trees inspired by the cast of the second season. These classes stand alone — the Season 1 Module is not required to use this book.

TK and Kari appear in both Season 1 and Season 2 with entirely different class trees. If both modules are enabled in a campaign, both trees are available as separate class options. No ability appears in both books.

Ken appears twice in this book — as the Digimon Kaiser and as his redeemed self. A Tamer who takes both is tracing the full arc of his story. Neither tree requires the other.

Class Rules at a Glance

Any Tamer can take any class if they meet the requirements. EXP spent on classes comes from the same pool as stats and skills — every purchase is a real tradeoff. You may hold abilities from multiple class trees simultaneously. Lower rows have higher requirements. You must purchase at least one ability in a row before accessing the next. All EXP costs and requirements are playtest values — subject to change.

Davis — Crest of Courage

The one who never knew when to quit. Davis Tamers do not push past limits — they refuse to acknowledge limits exist in the first place. Where others calculate risk, Davis just goes. Where others hesitate, Davis has already committed. Stubbornness is not a flaw. It is the whole strategy.

Entry Requirement

To unlock the first row: Courage rank 3

— Row 1 —

Never Back Down

300 EXP Requires: Entry requirement met Once per encounter when your Digimon fails an attack roll, they may immediately make the same attack again for free as part of the same action. The second roll uses the same target but counts as a separate attack. Missing twice means you try harder next time — not that you stop.

— or —

Gogglehead

300 EXP Requires: Entry requirement met Once per encounter you may declare a target as your Digimon's focus. Until the end of the encounter your Digimon deals +2 damage to that target on every hit. Switching focus costs your Free Action. You cannot focus on something without going all in.

— Row 2 —

Sheer Stubbornness

500 EXP Requires: Never Back Down, Courage rank 4 When your Digimon would be Paralyzed, Frozen, or Confused, they may make a Reinforce check DN 12 before the status applies. On a success the status is completely negated. On a failure it applies as normal. Davis Tamers do not stay down.

— or —

Tunnel Vision

500 EXP Requires: Gogglehead, Courage rank 4 While your Digimon has an active focus target from Gogglehead, they also gain +2 to all attack rolls against that target. The bonus does not apply to any other target. You have one goal. That is enough.

— Row 3 —

I Won

't Give Up 700 EXP Requires: Sheer Stubbornness, Courage rank 5 Once per session when your Digimon is reduced to 0 HP at Default Stage and would trigger the cascade, you may spend 8 Hope to refuse it. Your Digimon stays at 1 HP at their current Default Stage. Their Default Stage does not drop. They are still here. They are always still here.

— or —

One More Round

700 EXP Requires: Tunnel Vision, Courage rank 5 Once per encounter at the start of your turn, if your Digimon took damage last round, they gain temporary HP equal to your Courage rank. This happens automatically — you do not need to declare it. Getting hit just makes them more determined.

— Row 4 —

Unstoppable

1000 EXP Requires: Both Row 3 abilities, Courage rank 7 Once per session you may declare Unstoppable at the start of your turn. For the rest of this round your Digimon cannot be reduced below 1 HP by any attack, cannot be affected by any status effect, and their attacks cannot miss — every attack roll is treated as a hit regardless of the result. Natural 1s still deal no damage but the attack connects. One round. Absolute. Nothing stops them.

Yolei — Crest of Love

The passionate one who feels everything twice as hard. Yolei Tamers swing between extremes — furious one moment, tender the next, always at full intensity. They are not unstable. They are honest. And when they are on your side, there is nothing they will not do for you.

Entry Requirement

To unlock the first row: Love rank 3

— Row 1 —

Full Send

300 EXP Requires: Entry requirement met Once per encounter as a Basic Action, choose one ally Digimon within 4 spaces. They immediately gain +3 to their next attack roll and +3 damage on that attack. This must be used before they attack, not after. You back people completely or not at all.

— or —

Read the Situation Wrong

300 EXP Requires: Entry requirement met Once per encounter when you use a skill check and fail, you may immediately reroll it. If the second roll also fails, gain +2 to your next skill check this encounter — the embarrassment makes you sharper. Yolei's mistakes have a habit of teaching her something.

— Row 2 —

Fierce Loyalty

500 EXP Requires: Full Send, Love rank 4 Full Send now also removes one status effect from the chosen ally Digimon when activated. You boost them and you fix them at the same time. Anyone you back gets everything.

— or —

Emotional Spike

500 EXP Requires: At least 1 Row 1 ability, Love rank 4 Once per encounter when an ally Digimon is reduced to 0 HP in the same encounter, your Digimon immediately gains +4 to all attack rolls until the end of the round. Yolei does not handle loss quietly. Neither does her partner.

— Row 3 —

All or Nothing

700 EXP Requires: Fierce Loyalty, Love rank 5 Once per session as your Basic Action, choose one allied Digimon. Until the end of the round they deal double damage on every hit. At the end of the round they gain the Paralyze 2 status — the effort costs them. The gamble is always worth it.

— or —

Bounce Back

700 EXP Requires: Emotional Spike, Love rank 5 When your Digimon takes damage that would reduce them below half their max HP, they immediately restore HP equal to your Love rank. This triggers once per encounter and automatically — you do not need to declare it. She always finds her footing again.

— Row 4 —

Heart on Her Sleeve

1000 EXP Requires: Both Row 3 abilities, Love rank 7 Once per session at the start of your turn you may declare Heart on Her Sleeve. Choose one ally Tamer. For the rest of this encounter all of their Digimon's attack rolls and damage rolls use the higher of their own stat or yours. Your passion becomes their strength. You give everything you have and somehow it is exactly enough.

Cody — Crest of Reliability

The youngest one who carries the most weight. Cody Tamers move slowly and deliberately through everything they do. They do not rush. They do not cut corners. They hold to their principles even when it hurts — especially when it hurts. The kendo student who already knows that discipline is not a restriction. It is a weapon.

Entry Requirement

To unlock the first row: Reliability rank 3

— Row 1 —

Kendo Stance

300 EXP Requires: Entry requirement met Once per encounter at the start of your turn you may declare Kendo Stance. Until the start of your next turn your Digimon gains +3 to their Reliability stat. They take hits better when you are composed. Stance ends if your Digimon attacks — committing to a strike means leaving the defensive position.

— or —

Measured Step

300 EXP Requires: Entry requirement met Once per encounter as a Free Action on your turn, choose one enemy within 4 spaces of your Digimon. Make a Zero Error check DN 12. On a success you identify the optimal attack angle — your Digimon's next attack against that enemy ignores half their Love stat damage reduction, rounded down.

— Row 2 —

Hold the Line

500 EXP Requires: Kendo Stance, Reliability rank 4 While Kendo Stance is active your Digimon also gains +2 to all attack rolls. You are not hiding behind that wall — you are waiting for the right moment to strike through it.

— or —

Calculated Response

500 EXP Requires: At least 1 Row 1 ability, Reliability rank 4 Once per encounter when your Digimon is attacked and takes damage, you may use your Free Action to immediately make a Zero Error check DN 12. On a success your Digimon's next attack this round deals bonus damage equal to the damage they just received, up to a maximum of your Reliability rank x 2. You absorb information. You respond precisely.

— Row 3 —

Counter Strike

700 EXP Requires: Hold the Line, Reliability rank 5 While Kendo Stance is active, when your Digimon is attacked and the attack misses, they may immediately make a free Basic Attack against the attacker as a Free Action. This does not end Kendo Stance. Patience is not passivity.

— or —

Unbroken Code

700 EXP Requires: At least 1 Row 2 ability, Reliability rank 5 Once per encounter when your Digimon is targeted by a Confuse, Blind, or Freeze status effect, you may make a Firewall check DN 14 as a Free Action off-turn. On a success the status is completely negated. Cody's principles extend to his partner. What he will not let break in himself, he will not let break in them.

— Row 4 —

Perfect Form

1000 EXP Requires: Both Row 3 abilities, Reliability rank 7 Once per session at the start of your turn you may activate Perfect Form. For the rest of this encounter Kendo Stance no longer ends when your Digimon attacks — you maintain the defensive position through every strike. Your Digimon gains the full benefits of Kendo Stance and Hold the Line permanently for the duration, and Counter Strike triggers on every miss regardless of whether you declared the stance this turn. Cody does not reach Perfect Form. Perfect Form is simply what Cody looks like when he stops holding back.

Ken — The Digimon Kaiser

The genius who decided other people's limits were beneath him. Kaiser Tamers do not partner with their Digimon — they control them. They do not fight alongside their allies — they deploy them. Cold, precise, and absolutely certain they are the smartest person in every room. They are usually right. That is the problem.

Entry Requirement

To unlock the first row: Knowledge rank 4

— Row 1 —

Dark Spiral

300 EXP Requires: Entry requirement met Once per encounter as a Basic Action, target one enemy Digimon within 4 spaces. Make a Command check DN 12. On a success that Digimon takes -2 to all attack rolls and -2 to their Reliability until the end of the encounter — their own instincts are working against them. The Kaiser does not defeat enemies. He degrades them.

— or —

Calculated Cruelty

300 EXP Requires: Entry requirement met When your Digimon attacks an enemy that is currently affected by any status effect, they deal +Knowledge rank bonus damage. You target the already-broken. Efficiency is not callousness. It is just better tactics.

— Row 2 —

Control Freak

500 EXP Requires: Dark Spiral, Knowledge rank 5 Dark Spiral can now be used on two targets simultaneously in the same action. Both targets must be within 4 spaces. Make one Command check — if it succeeds both targets are affected. The Kaiser never wastes a move on one problem when one move can solve two.

— or —

Genius Protocol

500 EXP Requires: At least 1 Row 1 ability, Knowledge rank 5 Once per encounter as a Free Action, you may declare one specific move an enemy Digimon used this round. Until the end of the encounter your Digimon takes half damage from that move. You watched. You adapted. You already have the counter.

— Row 3 —

Absolute Dominance

700 EXP Requires: Control Freak, Knowledge rank 6 Once per encounter when your Digimon defeats an enemy Digimon, all remaining enemies within 3 spaces of the defeated Digimon gain the Paralyze 1 status. They saw what happened. They hesitate. Fear is a resource. The Kaiser uses all of them.

— or —

No Escape

700 EXP Requires: Genius Protocol, Knowledge rank 6 Once per encounter as a Free Action after an enemy Digimon moves, you may force them to stop 1 space short of their intended destination. Make a Command check DN 14. On a success their movement ends immediately. They do not go where they planned. They go where you allow.

— Row 4 —

Digimon Emperor

1000 EXP Requires: Both Row 3 abilities, Knowledge rank 8 Once per session at the start of your turn you may activate Digimon Emperor. Until the end of the encounter all enemies within 6 spaces take -3 to all attack rolls and -3 to their Reliability. All allies within 6 spaces gain +3 to all attack rolls. The Kaiser does not fight battles. He decides their outcomes before they begin. The field is his. Every piece on it moves because he permits it.

Ken — Redeemed

The one who has to live with what he did. Redeemed Ken Tamers carry their history like armour — heavy, visible, and the reason they never make the same mistake twice. They do not fight to win. They fight to protect. The guilt never leaves. They have decided to make it useful.

Entry Requirement

To unlock the first row: Friendship rank 3. Note: A Tamer does not need to have purchased any Kaiser abilities to take the Redeemed tree. Both trees are available independently. A Tamer who takes both is tracing Ken's full arc.

— Row 1 —**Take the Hit**

300 EXP Requires: Entry requirement met Once per encounter when an ally Digimon within 4 spaces is targeted by an attack, you may declare Take the Hit before the roll resolves. Your Digimon moves up to 4 spaces toward the ally and receives the attack instead — including all damage and status effects. The ally is completely unaffected. You step in front of harm now. Every time.

— or —**Wormmon**

's Trust 300 EXP Requires: Entry requirement met Your Digimon gains +2 to all attack rolls when fighting alongside at least one ally Digimon. The bond is real now. It was always supposed to be. This is what it feels like when it actually is.

— Row 2 —**Making It Right**

500 EXP Requires: Take the Hit, Friendship rank 4 Once per session at the start of an encounter, choose one ally Digimon. Remove all negative status effects from them immediately before the first turn begins. You cannot undo the past. You can make sure they start clean.

— or —**Genius For Good**

500 EXP Requires: Wormmon's Trust, Knowledge rank 4 Once per encounter as a Free Action, choose one ally Digimon about to make an attack. They gain +Knowledge rank to their damage roll on that attack. You still see every angle. Now you use that to help instead.

— Row 3 —

Human Shield

700 EXP Requires: Making It Right, Friendship rank 5 Take the Hit can now be used twice per encounter instead of once. Additionally when you use Take the Hit, your Digimon gains temporary HP equal to your Friendship rank before the attack resolves — a small buffer between them and what is coming. You have gotten very good at this. You do not intend to stop.

— or —

Weight of the Past

700 EXP Requires: Genius For Good, Knowledge rank 5 Once per encounter as a Basic Action, choose one enemy Digimon. Make a Command check DN 13. On a success that Digimon takes -3 to all attack rolls for the rest of the encounter. You understand exactly how they think. You used to think the same way.

— Row 4 —

Crest of Kindness

1000 EXP Requires: Both Row 3 abilities, Friendship rank 7 Once per session when you use Take the Hit, you may activate Crest of Kindness. Your Digimon takes no damage and suffers no status effects from that attack — the hit is completely absorbed. Nothing gets through. Not this time. Ken spent years being the reason people got hurt. He has decided that is finished.

TK — Crest of Hope

The miracle worker grew up. Season 2 TK Tamers are not waiting for things to turn around — they are making them turn around. Hope is still their weapon but they wield it with intention now. They have seen what happens when hope runs out. They have decided that is not something they will let happen.

Entry Requirement

To unlock the first row: Hope pool of 20 or higher (achieved by having any crest stat at rank 4 or higher)

Note: If the DigiDestined Adventure module is also enabled, TK has two separate class trees available — one from each module. No ability appears in both trees. Both trees can be purchased simultaneously.

— Row 1 —

Prepared This Time

300 EXP Requires: Entry requirement met At the start of each encounter before turns begin, you may spend 3 Hope to grant your Digimon temporary HP equal to your highest crest stat rank. You saw what unpreparedness cost last time. You planned for it.

— or —

Not Flinching

300 EXP Requires: Entry requirement met Once per encounter when your Digimon is targeted by an attack, you may spend 4 Hope to grant them +5 to their Reliability for that attack only. You have been in bad situations before. You know how to hold.

— Row 2 —

Rally Point

500 EXP Requires: Prepared This Time, Hope pool 25 or higher Once per encounter as a Basic Action, choose one allied Digimon that is below half their max HP. They immediately restore HP equal to your Hope pool divided by 5, rounded down. You always know who needs it most.

— or —

Keep Going

500 EXP Requires: Not Flinching, Hope pool 25 or higher Once per encounter when your Digimon would revert due to Hope running out, you may spend any amount of remaining Hope — even 0 — to delay the reversion by 1 round. This can only be used once per encounter. One more round. You always find one more round.

— Row 3 —

Light It Up

700 EXP Requires: Rally Point, Hope pool 30 or higher Once per session at the start of your turn you may declare Light It Up. All allied Digimon immediately restore HP equal to your highest crest stat rank. All allied Tamers restore 5 Hope. This does not cost an action. Hope is not a resource TK hoards. It is something he gives away.

— or —

The Right Moment

700 EXP Requires: Keep Going, Hope pool 30 or higher Once per session you may use your Free Action to hold your turn. At any point before your next turn begins you may interrupt any other character's action — ally or enemy — to act immediately. Move, use an item, digivolve, anything except attack. TK has learned when to wait and when to move.

— Row 4 —

Fortress

1000 EXP Requires: Both Row 3 abilities, Hope pool 40 or higher Once per session at the start of your turn you may activate Fortress. While Fortress is active you pay Hope equal to your highest crest stat rank at the start of each of your turns instead of your normal maintenance cost — this covers your own Digimon's upkeep as well. All other allied Tamers pay half their normal per-turn Hope cost, rounded down, for as long as Fortress is active. Fortress ends when your Hope hits 0, when you choose to end it as a Free Action on your turn, or when the encounter ends. You carry the weight so nobody else has to.

Kari — Crest of Light

The quiet power that was always there, finally understood. Season 2 Kari Tamers are no longer a mystery — they are a force. The light is not something that happens to her. It is something she chooses. She sees clearly, she acts deliberately, and when she decides something is worth protecting, nothing gets through her.

Entry Requirement

To unlock the first row: Love rank 3 OR Sincerity rank 3 — each Row 1 ability has its own entry requirement

Note: If the DigiDestined Adventure module is also enabled, Kari has two separate class trees available — one from each module. No ability appears in both trees. Both trees can be purchased simultaneously.

— Row 1 — Choose your path or take both —

Gentle Command

300 EXP Requires: Love rank 3 Once per encounter as a Basic Action, choose one non-boss enemy Digimon within 4 spaces. Make a Tame check DN 13. On a success that Digimon skips their next turn entirely — not stunned, not confused, simply still. They felt something in her presence and could not move against it. On a failure nothing happens and the action is spent.

— or —

Steadying Presence

300 EXP Requires: Sincerity rank 3 Once per session at the start of an encounter, all friendly Digimon on the field immediately remove all negative status effects before the first turn begins. You do not make noise. You do not make speeches. You simply being there makes everyone steadier.

— Row 2 — Requires at least 1 Row 1 ability —

Voice of Light

500 EXP Requires: Gentle Command, Love rank 4 Gentle Command can now target two non-boss enemy Digimon in the same action — both must be within 4 spaces. Make one Tame check against both. If it succeeds both are affected. If it fails neither is. The reach of her presence is wider than anyone expects.

— or —

Anchor

500 EXP Requires: Steadying Presence, Sincerity rank 4 Steadying Presence now also grants all friendly Digimon on the field resistance to Confuse and Blind status effects — if either would be applied they may immediately reroll the triggering effect with +3. Kari keeps people from coming apart. Quietly. Completely.

— Row 3 — Requires at least 1 Row 2 ability —

Still Waters

700 EXP Requires: Voice of Light, Love rank 5 Once per session as your Basic Action, choose one enemy Digimon. Make a Tame check — on a success that Digimon becomes completely passive for 2 rounds. They do not attack, move, or use abilities. If the affected Digimon takes any damage during this time the effect ends immediately and they return to normal. At the end of the 2 rounds they also return to normal. Kari does not always need her partner to win a fight. Sometimes she just needs a moment.

— or —

Unshakeable

700 EXP Requires: Anchor, Sincerity rank 5 Once per encounter as a Free Action off-turn when an allied Digimon would gain a negative status effect, you may spend 3 Hope to completely negate it. The effect never applies. This can be used on any allied Digimon within 6 spaces. You hold people together. You have always held people together.

— Row 4 —

Radiance

1000 EXP Requires: Both Row 3 abilities, Love rank 6 AND Sincerity rank 6 Once per session as a Basic Action, activate Radiance. Every enemy Digimon within 6 spaces must make a Firewall check DN 15. On a failure they cannot target any allied Digimon until the start of your next turn — they may still move and act freely but any attack aimed at an ally automatically misses regardless of the roll. Boss Digimon make this check but are not immune to failure. The light does not ask permission.

PART 2

Rules

About This Section

This section contains expanded rules introduced by the A New Destiny module. These mechanics are not part of the core rulebook — they only apply when the GM has enabled this module for their campaign.

Current Contents

Armor Digivolution: an ancient form of digivolution powered by Digi-Eggs rather than Hope. DNA Digivolution: originally introduced in the DigiDestined Adventure module. If that module is not enabled, the DNA Digivolution rules are reproduced in the appendix of this book for reference.

Armor Digivolution

Armor Digivolution is an ancient form of evolution that predates the modern digivolution chain. Instead of climbing through stages by willpower and Hope, a Digimon dons a suit of living armor formed from a Digi-Egg — a relic of the Digital World's earliest history. The result is not a higher form. It is a different kind of power entirely.

In game terms Armor Digivolution is a temporary Champion-level transformation accessed through a specific item rather than Hope. It runs on its own rules and does not interact with the normal digivolution chain except where explicitly stated.

Requirements

To Armor Digivolve

The Tamer must have the matching Digi-Egg item in their possession. The Digimon must be a species that can reach that specific Armor form. The Digimon must be at a stage that can digivolve to Champion — In-Training or Rookie. The Tamer spends their Basic Action on their turn to initiate.

How It Works

Armor Digivolution Rules

No Hope cost to initiate. No Hope cost to maintain. The Digi-Egg powers the form. The Armor form lasts for 7 turns from the moment it is activated. After 7 turns the Armor form expires automatically. The Digimon reverts to their previous stage. Does not count toward the 2-stage-above-Default-Stage limit. Counts as Champion stage for all other purposes — HP scaling, move slots, cascade rules, and size. Status effects are NOT cleared on Armor Digivolution — it is not a standard digivolution event.

Digivolving From an Armor Form

A Digimon in an Armor form can continue digivolving normally by spending Hope. Digivolving from an Armor form works exactly like digivolving from Champion. When the Digimon digivolves past the Armor form the Armor form ends immediately. The Digi-Egg is not consumed — it can be used again in a future encounter.

Digivolution Path from Armor

Armor Form (Champion) → spend Hope → Ultimate → spend Hope → Mega The Armor form is treated as Champion for stacking Hope costs. Example: Default Stage Rookie, current stage Ultimate via Armor path. Cost = Champion (6) + Ultimate (10) = 16 Hope per turn.

Expiring Naturally

When the 7 turn limit is reached the Armor form expires. The Digimon reverts to whichever stage they were at before Armor Digivolution. Hope costs resume normally on the Tamer's next turn.

The Digi-Egg Item

Digi-Eggs are loot items. They cannot be purchased. Each egg is tied to one specific Armor form. Carrying a Digi-Egg does not occupy an equipment slot — it is tracked separately on the Tamer's sheet as a special item. A Digi-Egg is not consumed on use. It can be used once per encounter.

Unlocking Armor Forms

Finding a Digi-Egg automatically unlocks the corresponding Armor form for a compatible Digimon. No EXP is required. No additional purchase is needed. The egg is the unlock.

Armor Forms Are Isolated from Stage-Modifying Rules

Armor forms exist outside the normal digivolution chain. They are not subject to any rule, class ability, or effect that modifies Default Stage, Max Default Stage, or digivolution stage limits. No ability can make an Armor form permanent, raise it beyond its fixed Champion stage, or count it as the Digimon's Default Stage. This applies to all current and future class abilities, items, and rules. The egg unlocks the form. The form is always temporary. These rules cannot be overridden by any other mechanic.

Quick Reference

Rule	Summary
How to initiate	Tamer spends Basic Action. Must have the Digi-Egg. Digimon must be In-Training or Rookie.

Rule	Summary
Hope cost	None — no cost to initiate or maintain.
Duration	7 turns from activation. Expires automatically.
Stage	Champion for all purposes.
Stage limit	Does not count toward the 2-stage-above-Default limit.
Status effects	Not cleared on Armor Digivolution.
Digivolving further	Spend Hope normally. Armor form ends immediately.
Expiring	Digimon reverts to previous stage. Hope costs resume.
Digi-Egg consumed?	No. Reusable once per encounter.
EXP to unlock?	No. Finding the egg is the unlock.

PART 3

Items

About Season 2 Items

This section contains items specific to the A New Destiny module. Core items available in every campaign are documented in Chapter 11 of the Core Rulebook. Season 1 items are documented in the DigiDestined Adventure module. Items from either source are available in a Season 2 campaign at the GM's discretion.

Item rules (types, slots, currency, and usage) are in Chapter 11 of the Core Rulebook. This section assumes familiarity with those rules.

Digivices

The D-3 replaces the Season 1 Digivice in campaigns using this module. A Tamer who upgrades to a D-3 can no longer use the Season 1 Digivice — one Digivice slot, one device.

D-3 Digivice

Type: Digivice Cost: Loot only — cannot be purchased Effect: Must be equipped to digivolve your partner. Required to use Digi-Eggs — without the D-3 a Tamer cannot initiate Armor Digivolution even if they possess a Digi-Egg. Glows when wild or hostile Digimon are within 6 spaces. As a Free Action, scan one visible enemy to learn their Attribute and Element. As a Basic Action, perform a deep scan on one visible enemy to learn their Attribute, Element, and one combat stat of your choice. The D-3 supports digivolution up to Mega stage — it does not have the Ultimate cap of the Season 1 Digivice.

The Digi-Eggs

Digi-Eggs are special items that enable Armor Digivolution. Each egg is tied to one specific Armor form and is compatible with specific Digimon species. See Part 2: Rules for the full Armor Digivolution rules.

All Digi-Eggs are Loot only. They cannot be purchased, traded for, or crafted. They are not consumed on use and can be used once per encounter. They do not occupy an equipment slot.

Digi-Egg of Courage

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Fladramon Element: Fire Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Fladramon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. The Digi-Egg of Courage burns with a fire that does not consume — it drives forward. Fladramon moves fast, strikes hard, and never hesitates.

Digi-Egg of Friendship

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Lighdramon Element: Electric Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Lighdramon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. The bond between two partners generates something neither could produce alone. Lighdramon is that bond made physical — fast, electric, and impossible to stop.

Digi-Egg of Love

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Holsmon Element: Wind Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Holsmon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Love lifts things higher than they could go alone. Holsmon takes to the sky and sees everything from above.

Digi-Egg of Sincerity

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Shurimon Element: Plant Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Shurimon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Sincerity cuts through noise. Shurimon is precise, agile, and absolutely committed to the strike. There is no wasted movement.

Digi-Egg of Knowledge

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Digmon Element: Earth Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Digmon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Knowledge goes deep. Digmon tears through earth and data alike, finding what is buried, exposing what was hidden.

Digi-Egg of Reliability

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Submarimon Element: Water Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Submarimon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Reliability keeps things moving even when everything is falling apart. Submarimon operates in depths nobody else can reach.

Digi-Egg of Hope

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Pegasmon Element: Light Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Pegasmon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Hope takes flight. Pegasmon soars above the battlefield, radiant and impossible to ignore.

Digi-Egg of Light

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Nefertimon Element: Light Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Nefertimon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Light reveals. Nefertimon is grace and power in equal measure — an ancient form from before the modern digivolution chain.

Digi-Egg of Kindness

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Pucchiemon Element: Neutral Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Pucchiemon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Kindness is not weakness. Pucchiemon moves with a gentleness that disarms — and then hits harder than anyone expected.

Digi-Egg of Miracles

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Magnamon Element: Light Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Magnamon. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Magnamon is not supposed to exist. The Digi-Egg of Miracles is legendary — rarer than any other egg, producing a form that operates at the edge of what Armor Digivolution can do. Finding this egg is an event. Using it is unforgettable.

Digi-Egg of Destiny

Type: Digi-Egg Cost: Loot only — cannot be purchased Armor Form: Rapidmon Armor Element: Light Effect: When the Tamer spends their Basic Action, the Digimon immediately Armor Digivolves into Rapidmon Armor. The form lasts 7 turns. No Hope cost. Compatible species are documented in the Season 2 Digimon compendium. See Part 2: Rules for full Armor Digivolution rules. Some things are moving toward a fixed point no matter what happens along the way. Rapidmon Armor is fast enough to meet destiny before it arrives.

Clothing

Clothing effects are passive and always active while equipped. Switching outfits takes no meaningful time outside of combat and a Free Action during combat.

Goggle Upgrade

Type: Clothing Cost: 30 Real World Money Effect: +2 to all Radar skill rolls while equipped. A step up from the standard goggles in the Core Rulebook — these have been modified, scuffed, adjusted, and made personal. Davis wore his everywhere. They stopped being goggles and started being a symbol.

Comms Headset

Type: Clothing Cost: 50 Real World Money Effect: +2 to all Broadcast and Scan skill rolls while equipped. You are always plugged in — reading the room, talking to the right person, processing information faster than anyone around you. Yolei could multitask better than anyone, and the headset made it look easy.

Kendo Gi

Type: Clothing Cost: 40 Real World Money Effect: +1 to all Ironclad and Zero Error skill rolls while equipped. Discipline worn on the outside. When you wear this, you carry the expectation of composure — and somehow you meet it. Cody never trained without his.

Reclaimed Coat

Type: Clothing Cost: 60 Real World Money Effect: Once per session when you take damage that would reduce you to 0 HP, reduce that damage by 5 before applying it. A coat that has seen the worst and is still here. Ken kept his. He did not know why for a long time. Eventually he understood — it was a reminder that he survived. And that the next person he hurt might not. He wears it differently now.

Equipment

Using Equipment costs a Basic Action unless the item states otherwise.

D-Terminal

Type: Equipment Cost: Loot only — cannot be purchased Effect: A handheld device paired with the D-3 Digivice. As a Free Action, check the D-Terminal to identify which Digi-Eggs in your possession are compatible with your partner's current form. As a Basic Action, interface with Digital World data structures within reach — similar to the Laptop but faster and more portable. Grants +2 to all Archive skill rolls when used to look up Digimon data. Cannot be used for Jack In or Decode checks — it is a reference device, not a hacking tool.

Kendo Shinai

Type: Equipment Cost: 35 Real World Money Effect: A practice sword carried into the Digital World. As a Basic Action, make a melee attack using your Reliability skill rank instead of your Digimon's Courage — this is a Tamer attack, not a Digimon attack. Deals 1d6 + Reliability rank damage. Does not benefit from Digimon stats or abilities. Sometimes the situation calls for a human to handle something themselves. Cody always knew when that moment was.

Portable Scanner

Type: Equipment Cost: 120 Real World Money / 300 DD Effect: As a Basic Action, scan one visible Digimon or Digital World structure within 6 spaces. Learn their Attribute, Element, and two combat stats of your choice. More thorough than the D-3 scan. Grants +1 to all Decode skill rolls involving Digital World systems. The scanner was a group tool — whoever had it was everyone's eyes.

Supplies

Supplies are consumable items used up on use. Using a Supply costs a Basic Action unless stated otherwise. Supplies can be used on Digimon.

Dark Ring Fragment

Type: Supply Cost: 200 DD — Digital World exclusive, rare Effect: A shard of a broken Dark Ring — the control devices used by the Digimon Kaiser. When used on a Paralyzed or Confused enemy Digimon as a Basic Action, make a Command check DN 13. On a success the target loses all Paralyze and Confuse stacks immediately and cannot be affected by those status effects for the rest of the encounter. The fragment burns through the control signal — and anything else running on that frequency. Handle with care.

Digi-Apple

Type: Supply Cost: 30 DD — Digital World foraging or merchants Effect: Restore 6 HP to one Digimon. A small sweet fruit that grows in certain Digital World regions. Common enough to find, good enough to carry. Tamers can eat them too but they are too sweet for most human tastes — Digimon tend to enjoy them more.

Control Spire Fragment

Type: Supply Cost: Loot only — found near destroyed Control Spires Effect: Once per encounter as a Basic Action, place this fragment within 2 spaces. Until the start of your next turn all Digimon within 3 spaces of the fragment — ally and enemy alike — cannot digivolve or dedigivolve. The fragment crumbles after use. What the Kaiser built to control, you can use to hold the line. For one turn. Use it well.

Food

Eating a meal costs no action and happens naturally during rest or downtime. Bonus effects last for the current session and do not stack with the same meal eaten twice.

Primary Village Fruit

Type: Food Cost: Free — found near Primary Village / 50 DD at merchants Effect: Counts as a meal for Digimon only. Prevents hunger. Restores 8 HP and removes one status effect from the Digimon immediately. Grown near Primary Village where Digi-Eggs hatch — the young Digimon who live there have made it their staple food. It is gentler than anything the deeper Digital World produces.

Homemade Onigiri

Type: Food Cost: 25 Real World Money / 80 DD Effect: Counts as a meal for the Tamer. Prevents hunger. Restores 8 HP immediately and grants +1 to all Mend and Recovery skill rolls for the current session. The first thing Ken brought when he finally showed up as a teammate instead of an enemy was food. Nobody forgot that. Sometimes the smallest gesture is the one that counts.

Digital World Ramen

Type: Food Cost: 60 DD — Digital World vendors Effect: Counts as a meal for both Tamer and Digimon. Prevents hunger. Restores 10 HP to both the Tamer and their Digimon immediately. Hot, filling, and somehow always available at exactly the wrong moment — right before a fight, never after. The Digital World has its own sense of timing.

Playtest Notes — v0.1

This is the first compiled draft of the A New Destiny module. All values are playtest numbers and subject to change.

When playtesting track the following:

— Does Davis feel distinct from Tai despite sharing the Courage crest? — Is Unstoppable too powerful — automatic hits, 1 HP floor, and status immunity in one round? — Is the Kaiser class enjoyable to play in a cooperative game? — Does Ken Redeemed feel meaningfully different from Kaiser at the table? — Does TK S2 feel different from TK S1 if both modules are enabled? — Does Fortress feel worth the investment — paying your own Hope to halve everyone else's cost? — Does Radiance's one-round window feel long enough to justify a Basic Action? — Does 7 turns feel like the right Armor Digivolution duration? — Does free Hope cost make Armor Digivolution too strong compared to normal Champion digivolution? — Does the Control Spire Fragment feel useful or too situational? — Is the Dark Ring Fragment clear enough in how it interacts with status effects? — Are there obvious Season 2 items from the show still missing from this list?

Compatible species for each Digi-Egg will be documented in the Season 2 Digimon compendium. For now the GM should determine compatibility based on canon source material.

Report findings to the designer.
