

TAMER'S BOND

TAMERS

Season 3 Module

The Bond Between Two Worlds

Tamers Season 3

Season 3 Module

Playtest Draft v0.1

About This Book

Tamers Season 3 is the third season module for Tamer's Bond. It introduces the class trees, expanded rules, and item compendium built around the world and characters of Digimon Tamers.

What's Inside

Part 1: Classes — Seven class trees, one for each of the Tamers. Any Tamer can take any class. Part 2: Rules — Biomerge Digivolution and the Card Slash system. Part 3: Items — The full Season 3 item compendium including the D-Power, Modify Cards, gear, supplies, and food.

Familiarity with the Tamer's Bond Core Rulebook is assumed throughout. Core item rules, stat rules, and combat rules are not repeated here.

PART 1

Classes

About Season 3 Classes

The Tamers Season 3 module introduces seven class trees, each inspired by one of the Tamers — their personalities, their approach to their Digimon, and the reality of a world where the Digital World bleeds into ours without warning.

Class Rules at a Glance

Any Tamer can take any class if they meet the requirements. EXP spent on classes comes from the same pool as stats and skills — every purchase is a real tradeoff. You may hold abilities from multiple classes simultaneously. Lower rows have higher requirements. You must purchase at least one ability in a row before accessing the next. All EXP costs and requirements are playtest values — subject to change.

Takato — Crest of Courage

The dreamer who drew his own Digimon into existence and then had to figure out how to deserve him. Takato Tamers lead through love and stubbornness in equal measure — they imagine what their partner could become and then throw everything they have at making it happen. The bond is everything. When it breaks, they break with it. When it holds, nothing can stop them.

Entry Requirement To unlock the first row: Courage rank 3

— Row 1 —

Drawing Strength

300 EXP Requires: Entry requirement met* Once per session during a short rest, you may describe your Digimon performing a new technique you imagined for them. Until the next long rest your Digimon gains access to one additional move from their pool as a fifth active slot — it does not replace their signature move or any of their three learned moves. The move must be one your Digimon has access to at their current stage. Sometimes imagination is the first step to real power.

— or —

Never Give Up

300 EXP Requires: Entry requirement met* Once per encounter when your Digimon would fail an attack roll by 3 or less — falling just short of the hit threshold — the attack grazes. A graze deals half normal damage, bypasses no defences, and triggers no additional effects. The intent behind the strike was real even if the execution was not.

— Row 2 —**Gogglehead's Resolve**

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* When your Digimon is at half HP or below they deal +3 bonus damage on all attacks. Takato does not back down when things get bad. Neither does Guilmon.

— or —**Partner's Glow**

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* At the start of each of your turns, if your Digimon is digivolved above their Default Stage, you may spend 2 Hope to grant them +2 to their next attack roll AND +2 damage on that attack. The warmth between a Tamer and their partner has weight. It lands.

— Row 3 —**Biomerger Ready**

800 EXP Requires: Both Row 2 abilities, Courage rank 6* Your Tamer may now participate in Biomerger Digivolution. See Part 2: Rules for full details. Additionally, when you initiate Biomerger, the corruption check gains +2 to the roll. You have been building toward this from the first moment you saw Guilmon in the Digital Field. You were always going to make it here.

Rika — Crest of Sincerity

The Digimon Queen who does not need anyone and then spends an entire season learning she was wrong. Rika Tamers are precise, cold, and devastating in a straight fight — but their real power comes from grudging respect that turns into something more. The bond builds slowly and holds like steel.

Entry Requirement To unlock the first row: Sincerity rank 3

— Row 1 —**Queen's Precision**

300 EXP Requires: Entry requirement met* When your Digimon lands a hit, you may choose to forgo any status effect tags on the attack. If you do, deal +2 additional damage. Rika does not waste moves on effects. She just hits harder.

— or —

Ice Wall

300 EXP Requires: Entry requirement met* Once per encounter as a Free Action after your Digimon is targeted by an attack — before the hit rolls — you may force the attacker to reroll their hit roll and take the lower result. You saw it coming. You always see it coming.

— Row 2 —

Ruthless Efficiency

500 EXP Requires: At least 1 Row 1 ability, Sincerity rank 4* When your Digimon defeats an enemy this encounter, they gain +2 to all attack rolls for the remainder of the encounter. Once you start, you do not stop until it is finished.

— or —

Cold Read

500 EXP Requires: At least 1 Row 1 ability, Sincerity rank 4* Once per encounter as a Free Action on your turn, name a stat — Courage, Friendship, Love, Knowledge, Sincerity, or Reliability. The GM tells you whether the target enemy's total in that stat is lower than, equal to, or higher than your Digimon's total. Rika does not guess. She calculates.

— Row 3 —

Digimon Queen

700 EXP Requires: Ruthless Efficiency, Sincerity rank 5* When your Digimon deals enough damage in a single hit to reduce a target to 0 HP, they may immediately make one additional Basic Attack against an adjacent enemy as a Free Action. Finishing a fight fast is its own form of mercy.

— or —

I Don't Need Anyone

700 EXP Requires: Ice Wall, Sincerity rank 5* Ice Wall can now be used once per encounter against each individual enemy rather than once per encounter total. Once you know how someone fights the wall is always ready for them.

— or —

Grudging Respect

700 EXP Requires: At least 1 Row 2 ability, Sincerity rank 5* Once per session, choose one ally Digimon. Until the end of the encounter your Digimon and that ally each gain +2 to all damage rolls when within 3 spaces of each other. Rika does not say it out loud. She does not have to.

— Row 4 —

The Digimon Queen Needs No One. Except Maybe One Person.

1000 EXP Requires: Any two Row 3 abilities, Sincerity rank 7* Once per session at the start of your turn you may activate this ability. Your Digimon immediately gains temporary HP equal to your Sincerity rank x 4. While temporary HP remains your Digimon deals +4 bonus damage on all attacks. Temporary HP from this ability is lost before regular HP and is removed at end of encounter. Rika spent a long time pretending she had no one. When she stopped pretending she became something unstoppable.

Henry — Crest of Friendship

The pacifist who is also the most tactically dangerous person in the room. Henry Tamers hate unnecessary violence and are therefore extremely good at making violence unnecessary — or, when it is necessary, ending it as efficiently as possible. The damage they do not deal is as important as the damage they do.

Entry Requirement To unlock the first row: Friendship rank 3

— Row 1 —

Measured Response

300 EXP Requires: Entry requirement met* When your Digimon is attacked, if you have not taken your turn yet this round, you may use a Free Action to grant your Digimon +3 to their Reliability for that attack only. You anticipated it. You prepared. You let it come.

— or —

Tactical Restraint

300 EXP Requires: Entry requirement met* Once per encounter as a Free Action on your turn, choose one enemy Digimon within 6 spaces. That enemy's Speed is treated as 2 lower when determining turn order next round. You are not stopping them. You are slowing the moment down.

— Row 2 —

Calculated Peace

500 EXP Requires: At least 1 Row 1 ability, Friendship rank 4* Once per encounter as your Basic Action, you may attempt to de-escalate a non-boss enemy. Make a Rally skill check DN 16. On a success the enemy skips their next action. This does not work on enemies that have been attacked this encounter. Henry is not naive. He picks his moments.

— or —

Cover Fire

500 EXP Requires: At least 1 Row 1 ability, Friendship rank 4* Once per encounter when an ally Digimon within 4 spaces is targeted, your Digimon may make a single Basic Attack against that attacker as a Free Action before the attack resolves. Terriermon would complain about this. Henry has long since stopped asking.

— Row 3 —

Last Resort

700 EXP Requires: Calculated Peace, Friendship rank 5* Once per encounter as your Basic Action, Henry's Digimon takes a completely defensive stance. Until the start of Henry's next turn all damage dealt to any allied Digimon within 3 spaces is reduced by your Friendship rank. Your Digimon cannot attack while the stance is active. Sometimes the most powerful thing you can do is hold the line and let everyone else breathe.

— or —

Momentai

700 EXP Requires: Cover Fire, Friendship rank 5* Once per session as a Free Action, you may declare Momentai. All allies within 6 spaces who can hear you immediately remove one negative status effect. Take it easy. It will work out.

— Row 4 —**The Hardest Kind of Strong**

1000 EXP Requires: Both Row 3 abilities, Friendship rank 7* Once per session at the start of an encounter, before any turns begin, you may declare your intent not to initiate offensive action this encounter. While you have not attacked — your Digimon has not targeted an enemy with a damage-dealing move — all allied Digimon gain +2 to Reliability and +2 to their Love stat for damage reduction. The moment your Digimon deals damage the bonus ends. Henry knows the difference between strength and violence. This is what he was always trying to prove.

Jeri — Crest of Light

The one who holds her grief and keeps going anyway. Jeri Tamers survive things that should break them and somehow find something left to give. Their power does not come from strength — it comes from love that does not know how to quit. The bond they form with their Digimon is tender, deep, and more resilient than it looks.

Entry Requirement To unlock the first row: Love rank 3

— Row 1 —**Gentle Presence**

300 EXP Requires: Entry requirement met* When you use the Mend skill on an ally — Tamer or Digimon — add your Love rank as a flat bonus to the result on top of the normal skill formula. Jeri has always known how to reach people in pain.

— or —**Leomon's Lesson**

300 EXP Requires: Entry requirement met* Once per encounter when your Digimon is at 25% HP or below they may use their Move Action as a Free Action this round. Some lessons about what it means to fight for someone stay with you forever.

— Row 2 —**Hold On**

500 EXP Requires: At least 1 Row 1 ability, Love rank 4* Once per encounter when your Digimon would trigger the cascade at Default Stage, you may spend 6 Hope to have them stabilise at 1 HP instead. Default Stage does not drop. They are still here because you would not let them go.

— or —

Puppet Show

500 EXP Requires: At least 1 Row 1 ability, Love rank 4* Once per encounter as a Free Action, you may use your puppet to distract one enemy within 4 spaces. That enemy takes -2 to their next attack roll. It sounds silly. It works every time. Jeri has never explained why.

— Row 3 —

Grief and Light

700 EXP Requires: Hold On, Love rank 5* Once per session at the start of your turn you may spend 5 Hope. All allied Digimon immediately restore HP equal to your Love rank x 2. This does not cost your Basic Action. Jeri has been through the worst the Digital World has to offer. She still finds something to give.

— or —

What Leomon Taught Me

700 EXP Requires: Leomon's Lesson, Love rank 5* When your Digimon is at 50% HP or below they may use moves they know from one stage higher than their current stage. Stage lock rules are suspended for your Digimon only while this condition is active. The strength that comes from loss does not follow the rules.

— Row 4 —

Still Here

1000 EXP Requires: Both Row 3 abilities, Love rank 7* Once per session when your partner Digimon is reduced to 0 HP, you may immediately activate Still Here. The cascade resolves normally — but before it does, restore HP to your Digimon equal to your Love rank. Then immediately take a bonus turn outside of normal turn order. This bonus turn does not count toward your turn in the current round. Jeri spent a long time believing she was not strong enough to survive the things that happened to her. She was wrong the whole time.

Kazu — Crest of Reliability

The loudest voice in the room who somehow ends up being exactly what the situation needed. Kazu Tamers talk big, fall on their face, get back up, and keep moving. Their abilities are built on bold calls and high-stakes gambles that pay off just often enough to justify the confidence.

Entry Requirement To unlock the first row: Reliability rank 3

— Row 1 —

Trash Talk

300 EXP Requires: Entry requirement met* Once per encounter as a Free Action on your turn, choose one visible enemy. That enemy must succeed on a Firewall skill check DN 12 or take -2 to their next attack roll — they are rattled. Kazu does not always know what he is doing. The enemy does not need to know that.

— or —

Guardromon's Partner

300 EXP Requires: Entry requirement met* Once per encounter as a Free Action, when an allied Digimon within your Friendship rank x 2 spaces is about to take damage, you may swap places with that Digimon and take the damage yourself instead. The damage number is whatever was going to be applied to the ally — it is not recalculated through your own resistances, weaknesses, or Love stat. You simply take the number. Kazu spent a lot of time watching other people fight. He learned when to step in.

— Row 2 —**All In**

500 EXP Requires: At least 1 Row 1 ability, Reliability rank 4* Once per encounter before your Digimon makes an attack roll, you may declare All In. Double the damage dice on that attack if it hits. If it misses, your Digimon cannot make any attacks next round — they are completely off balance. Kazu has never done anything halfway.

— or —**Comeback Kid**

500 EXP Requires: At least 1 Row 1 ability, Reliability rank 4* When your Digimon misses an attack roll, their next attack roll this encounter gains +4. Kazu handles failure the same way he handles everything else: loudly and with immediate plans for a second attempt.

— Row 3 —**Better Than I Look**

700 EXP Requires: All In, Reliability rank 5* All In no longer causes your Digimon to lose their next round's attacks on a miss — they take -2 to their next attack roll instead. A miss is still a miss. But Kazu has gotten very good at missing his way back into the fight.

— or —**Cheerleader**

700 EXP Requires: Comeback Kid, Reliability rank 5* Once per encounter as a Free Action on your turn, choose one enemy Digimon. Until the start of your next turn all allied Digimon that attack that target gain +1 to their attack rolls against it. Kazu's enthusiasm is obnoxious in the best possible way.

Kenta — Crest of Knowledge

The anxious one who knows more than he lets on and is braver than anyone gives him credit for. Kenta Tamers are the person who has read everything and remembers all of it — and whose real power comes from being there even when they are terrified. MarineAngemon picked him for a reason.

Entry Requirement To unlock the first row: Knowledge rank 3

— Row 1 —

I Read About This

300 EXP Requires: Entry requirement met* Once per session at the start of an encounter, you automatically learn one piece of information about one enemy of your choice — their Attribute, their Element, or whether they are stronger or weaker than your Digimon overall. No check required. Kenta has read a lot of Digimon cards. It turns out they had real information in them.

— or —

Unlikely Protector

300 EXP Requires: Entry requirement met* Once per encounter when an ally Tamer within 2 spaces takes damage that would reduce them to 0 HP, you may spend 4 Hope to take half that damage yourself instead — rounding the halved amount down. The ally takes the other half and may survive at 1 HP or higher. MarineAngemon chose someone brave. Kenta is still catching up to that fact.

— Row 2 —

Deep Archive

500 EXP Requires: I Read About This, Knowledge rank 4* I Read About This now reveals two pieces of information instead of one on the same target. Kenta reads everything twice.

— or —

Tiny But Fierce

500 EXP Requires: At least 1 Row 1 ability, Knowledge rank 4* When your Digimon is attacked by a Digimon that is larger than them — determined by stage, with the attacking Digimon being at a higher stage than yours — you may reduce the attacker's hit chance by 1, applied before the roll. A partner this small is hard to hit right even when you aim right.

— Row 3 —

Kotemon Wouldn't Have Been So Bad Either

700 EXP Requires: Deep Archive, Knowledge rank 5* Once per session before any roll is made, you may declare that you have researched this specific situation. The GM must tell you the exact DN of the roll before you commit to attempting it. Knowledge is power. Knowing the odds before you commit is just good tactics.

— or —

Heart Patter

700 EXP Requires: Tiny But Fierce, Knowledge rank 5* Once per session as a Free Action, MarineAngemon bestows Heart Patter on one allied Digimon within 3 spaces. That Digimon immediately restores HP equal to your Knowledge rank x 3. It has no business being as effective as it is.

Ryo — Crest of Courage

The legendary Tamer who carries more than anyone knows. Ryo Tamers have already been through something — their history is longer and stranger than they let on, and their abilities reflect a depth of experience that other Tamers are still building toward. They are not the strongest in the room by statistics. They are the most prepared.

Entry Requirement To unlock the first row: Courage rank 3 AND at least one other stat at rank 4 or higher

— Row 1 —

Legendary Status

300 EXP Requires: Entry requirement met* Once per session when you enter an encounter, you may declare Legendary Status as a Free Action. One enemy of your choice — not a boss — immediately focuses their attention on your Digimon for the first two rounds, preferring to attack them over other targets when able. You control the threat. You decide who gets hit.

— or —

Been Here Before

300 EXP Requires: Entry requirement met* After you fail a skill check, add +3 to your result. This may turn a failure into a success. Ryo has been a lot of places. He does not always explain how he knows things.

— Row 2 —

Monodramon's Edge

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* Your Digimon's first attack each encounter automatically hits — no hit roll required. The first move of a prepared fighter is not a question. Ryo knows exactly how to open a fight.

— or —

Tactical History

500 EXP Requires: At least 1 Row 1 ability, Courage rank 4* At the start of each encounter before turns begin, you may name one move type by tag — MELEE, RANGE, BURST, BLAST, CHARGE, or COUNTER. Until the end of the round your Digimon takes -2 damage from attacks with that tag. Ryo has seen every kind of attack. He plans accordingly.

— Row 3 —

The Long Road

700 EXP Requires: Monodramon's Edge, Courage rank 5* Once per session at any point during an encounter, you may spend 10 Hope to immediately restore your Digimon to their current maximum Default Stage at full HP for that stage — even if the cascade has reduced their Default Stage below that point. After using this ability your Digimon cannot digivolve above their Default Stage for the rest of the session. The road Ryo walked to get here was long. It left him with something most Tamers do not have.

— or —

Legendary Tamer

700 EXP Requires: Tactical History, Courage rank 5* Legendary Status is now usable once per encounter instead of once per session. Additionally the focused enemy takes -2 to all attack rolls while Legendary Status is active and your Digimon is their primary target. When Ryo wants to be the target, the target tends to look at nothing else.

— Row 4 —**I've Already Won This Fight**

1000 EXP Requires: Both Row 3 abilities, Courage rank 7* Once per session after an enemy declares an attack but before any rolls are made, you may activate this ability. The attack misses automatically. No roll required. Ryo smiles. He saw it coming before the encounter started. He has been here before. He won then too.

PART 2

Rules

About This Section

This section contains expanded rules introduced by the Tamers Season 3 module. These mechanics are not part of the core rulebook — they only apply when the GM has enabled this module for their campaign.

Current Contents

Biomerge Digivolution: the Tamer and Digimon fuse into a single entity — one consciousness, one body, one set of actions per turn. Card Slash System: Tamers acquire and use Modify Cards to alter combat in real time.

Biomerge Digivolution

Biomerge Digivolution is the merging of a Tamer's body and consciousness with their Digimon partner. The result is not a Tamer riding inside a giant monster — it is one being made of both of them, with a single will and a power that neither could reach alone.

Biomerge is a desperation move. You use it when the fight has gone badly enough that losing your Tamer as an independent actor is worth it, or when your Hope is running dry and you need to stay at Mega. You always come back at 1 HP. That is the price, win or lose.

Requirements

To Biomerge:

The Tamer must have the Biomerge Ready class ability from the Takato class tree, or the GM must unlock it through a specific story milestone. The Digimon must be at Default Stage when Biomerge is initiated — you cannot Biomerge from an already digivolved form. The Digimon must have their Mega form unlocked (20,000+ Digimon EXP).

Initiating Biomerge — The Corruption Check

Biomerge costs your Basic Action on your turn. Before the merge resolves, you must make a corruption check.

The Corruption Check

Choose one of the following skills: Firewall, Core Drive, Reinforce, or Ironclad. You may choose a different skill each time you Biomerge. Roll against DN 12. On a success — Clean Biomerge: The Tamer and Digimon merge into a single form at Mega stage. Proceed normally. On a failure — Corrupted Biomerge: The form that emerges is corrupted. The Tamer is still inside — they are off the field under the same rules as a clean merge. The corrupted form follows the standard corruption rules from Chapter 8 of the Core Rulebook. The Tamer cannot voluntarily end the Biomerge while the form is corrupted. The merge runs until the encounter ends or the form hits 0 HP. Note: The Biomerge Ready class ability grants +2 to this roll.

While Merged

Biomerge Rules

The Tamer is removed from the battlefield. They cannot be targeted, cannot use items, and cannot act independently. The Biomerge form acts on the Tamer's original turn in initiative order. The Digimon's original turn slot is inactive — the merged form does not act twice. The merged form uses the Digimon's full Mega stats normally. No Hope cost is paid to maintain the Biomerge form. It sustains for as long as the encounter lasts or until it ends by another means. The Tamer's purchased class abilities are available to the merged form and can be used on its turn as normal. The Biomerge form is locked at Mega stage. No further digivolution of any kind — upward or downward — is possible for the rest of the encounter once Biomerge is initiated.

Ending Biomerge

Biomerge ends when:

The form is reduced to 0 HP. The Tamer voluntarily ends it on their turn as a Free Action (clean Biomerge only — corrupted Biomerge cannot be voluntarily ended). The encounter ends. On ending: The Tamer returns to the field in the space the form occupied at 1 HP — regardless of how the encounter went. The Digimon reverts to Default Stage. The Tamer enters the Weakened State (see Chapter 9) until they complete a long rest. If the Biomerge form is reduced to 0 HP, the cascade applies to the Digimon normally and the Tamer returns at 0 HP — they are immediately Defeated as per Chapter 9.

Quick Reference — Biomerge

Rule	Clean Biomerge	Corrupted Biomerge
Corruption check	DN 12 — success	DN 12 — failure
Hope cost to maintain	None	None
Tamer on field?	No — merged, untargetable	No — still inside, untargetable
Further digivolution?	No — locked at Mega	No — locked at Mega
Can end voluntarily?	Yes — Free Action	No — runs until 0 HP or encounter ends
Tamer HP on end	1 HP, Weakened State	1 HP, Weakened State
Digimon on end	Default Stage	Default Stage after corruption resolves

Pros and Cons at a Glance

Pros: — Zero Hope cost. Sustain Mega for the entire encounter without draining your pool. — Tamer class abilities remain usable through the merged form. — No forced reversion from Hope running out. Cons: — Action economy loss. One turn between Tamer and Digimon instead of two. — Tamer off the field and unable to act, use items, or help allies independently. — No further digivolution of any kind after merging. — Always return at 1 HP in Weakened State, win or lose. — Corruption risk on every initiation — fail the DN 12 check and the form comes out wrong and you cannot escape it.

Card Slash System

The Tamers do not just watch their Digimon fight — they intervene. Modify Cards are physical cards embedded with Digital World data that, when slashed through a Digivice, alter the parameters of their partner in real time. Loading a card mid-fight is not a strategy. It is a last-second solution to a problem that just got very serious.

The Card Slash system applies to the Tamers Season 3 module. Any Tamer can use Modify Cards — no class ability is required. Cards must be acquired before they can be used.

Acquiring Cards

How Tamers Get Cards

Cards are purchased, found, traded, or awarded by the GM as loot. See Part 3: Items for the full card compendium and prices. Tamers can carry any number of cards. They are small and light. Cards are single-use — once slashed, the card is spent and cannot be used again. Some rare cards cannot be purchased. The GM determines how they are obtained.

Using a Card — The Slash

Card Slash Rules

Slashing a card costs the Tamer's Basic Action on their turn. Only one card can be slashed per turn — you cannot slash multiple cards in the same turn. The Tamer must be holding the card and have their D-Power equipped. The effect applies immediately. Cards cannot be slashed on another character's turn unless a class ability or card effect specifically states otherwise. Cards can be directed to an allied Digimon within 4 spaces instead of your own partner. The GM may rule that certain cards cannot be redirected. Cards cannot be slashed by the Tamer while inside a Biomerger form — this must be done by an allied Tamer.

Card Rarity

Rarity	Availability	Power Level
Common	Purchased from card shops	Modest, reliable benefit
Uncommon	Limited stock, Digital World vendors	Meaningful combat advantage
Rare	Quest rewards, loot, trade only	Significant or unique effect
Super Rare	GM determined only	Encounter-changing

Card Interactions with Other Rules

Card effects that raise a stat raise the total stat — they are Conditional modifiers and clear at end of encounter. Card effects do not stack with themselves — slashing two copies of the same card provides no additional benefit beyond the first.

PART 3

Items

About Season 3 Items

This section contains items specific to the Tamers Season 3 module. Core items are documented in Chapter 11 of the Core Rulebook and are not repeated here.

Item rules — types, slots, currency, and usage — are in Chapter 11 of the Core Rulebook. This section assumes familiarity with those rules.

Digivices

D-Power (Season 3 Digivice)

Type: Digivice Cost: Loot only — cannot be purchased Effect: Must be equipped to digivolve your partner or use the Card Slash system. Required to slash Modify Cards — without the D-Power equipped cards cannot be used. Glows when Wild Ones — unpartnered Digimon — are within 6 spaces. As a Free Action, scan one visible Digimon to learn their Attribute and Element. As a Basic Action, perform a deep scan to learn Attribute, Element, and one combat stat of your choice. The D-Power supports digivolution up to Mega stage and is required for Biomerge Digivolution. Older Digivices do not work with the Season 3 Card Slash system.

Accessories — The Digivice Tag

Digivice Tag

Type: Accessory Cost: Loot only — story reward Effect: +5 to your Hope pool. Also functions as a card holder — you may carry 10 additional Modify Cards beyond your normal carrying capacity. The Tag is the anchor. The cards are what you load into it.

Clothing

Clothing effects are passive and always active while equipped. Switching outfits takes no meaningful time outside of combat and a Free Action during combat.

Red Goggles

Type: Clothing Cost: 15 Real World Money Effect: +1 to all Radar skill rolls while equipped. Takato never goes anywhere without them. They do not actually help him see better. The confidence does.

Yellow Vest

Type: Clothing Cost: 25 Real World Money Effect: +1 to all Ironclad skill rolls while equipped. When you take damage from an attack reduce that damage by 1 before applying. Rika would never wear one. That is not the point.

Tamer's Jacket

Type: Clothing Cost: 40 Real World Money Effect: +1 to all Command skill rolls while equipped. The person wearing the jacket is the one who makes the call. That is the whole point of the jacket.

Funeral Dress

Type: Clothing Cost: 60 Real World Money Effect: +2 to all Mend and Firewall skill rolls while equipped. The GM may grant advantage on Mend checks made to calm corrupted Digimon while wearing this outfit. Jeri wore this when she had nothing left. Somehow it still held her together.

School Blazer

Type: Clothing Cost: 35 Real World Money Effect: No mechanical effect in the Digital World. In the human world grants +1 to all Rally and Broadcast checks when blending in matters. Looking normal is its own kind of cover.

Equipment

Using Equipment costs a Basic Action unless the item states otherwise.

Card Binder

Type: Equipment Cost: 20 Real World Money Effect: Doubles your Modify Card carrying capacity. As a Free Action you may search your binder for a specific card — you do not need to know where it is in the stack. Kazu organises his by colour. Rika organises hers by attack type and maintains a priority list.

Portable Card Reader

Type: Equipment Cost: 80 Real World Money Effect: Once per session during a short rest, scan up to three of your Modify Cards. The GM tells you the mechanical effect of each scanned card before you use it — you know exactly what you are loading before the fight starts.

Emergency Kit

Type: Equipment Cost: 60 Real World Money / 150 DD Effect: Contains 2 Bandages and 1 Antidote. Once per session if you have not opened the kit this session you may use it as a Free Action rather than a Basic Action.

Sock Puppet

Type: Equipment Cost: 5 Real World Money Effect: As a Free Action perform a brief puppet show to distract one enemy within 3 spaces. That enemy takes -1 to their next roll this round. Cannot distract the same enemy twice in one encounter. Jeri's puppet is famous. This one is not Jeri's puppet. It still works.

Digital Field Detector

Type: Equipment Cost: 300 DD — Digital World only Effect: As a Free Action detect whether a Digital Field is forming or active within 20 spaces. As a Basic Action scan a Digital Field to determine its approximate radius and intensity — the GM tells you how dangerous it is and whether there is a Wild One inside. Thirty seconds of warning is the difference between a fight you chose and a fight you stumbled into.

Supplies

Supplies are consumable items used up on use. Using a Supply costs a Basic Action unless stated otherwise.

Taming Collar

Type: Supply Cost: 400 DD — Digital World only Effect: As a Basic Action attempt to use the Tame skill on a Wild One that has been reduced to 25% HP or below. The check is DN 16. On a success the Wild One submits — it does not join the party but will not fight further this encounter. The GM determines long-term effects.

Digi-Core Patch

Type: Supply Cost: 350 DD — Digital World only Effect: Restore 12 HP to one Digimon AND remove one status effect. Cannot be used on Tamers.

Hypnos Signal Jammer

Type: Supply Cost: 500 DD / 200 Real World Money — rare Effect: As a Basic Action activate the jammer. For 3 rounds all enemies within 6 spaces of you take -2 to their attack rolls — their target data is degraded. After 3 rounds the jammer burns out and is spent.

Calumon Dust

Type: Supply Cost: Cannot be purchased — GM awarded only Effect: Spend as a Free Action on your turn. Your Digimon immediately digivolves one stage above their Default Stage at no Hope cost. This digivolution does not require a Basic Action. The Hope maintenance cost still applies from next turn. Calumon never understood why this worked. He just knew that it did and that people seemed happy when it happened.

Modify Cards

Modify Cards are slashed through the D-Power as a Basic Action on the Tamer's turn. One card per turn. Single use — the card is spent after slashing. See Part 2: Rules — Card Slash System for full usage rules.

Common Cards

Card	Cost	Effect when slashed
Speed Plug-In S	50 DD / 15 Real World Money	+2 to your Digimon's Speed until end of round.
Power Plug-In P	50 DD / 15 Real World Money	+2 to your Digimon's Knowledge (damage) until end of round.

Card	Cost	Effect when slashed
Shield Plug-In Sh	50 DD / 15 Real World Money	+2 to your Digimon's Love (damage reduction) until end of round.
Sniper Plug-In	60 DD / 20 Real World Money	+3 to your Digimon's next attack roll only.
Hyper Wing	60 DD / 20 Real World Money	Your Digimon gains Air movement type until end of round.
Goto Plug-In G	80 DD / 25 Real World Money	Your Digimon may immediately move up to 3 spaces as a Free Action.
Kuwagatamon Joust	80 DD / 25 Real World Money	Your Digimon's next attack gains the [PIERCE] tag — ignores Love damage reduction.

Uncommon Cards

Card	Cost	Effect when slashed
Alias III	150 DD / 50 Real World Money	Your Digimon cannot be targeted by enemy attacks until the start of your next turn.
Agumon Attack	150 DD / 50 Real World Money	+1d6 bonus damage on your Digimon's next attack, applied after all other calculations.
Cyberdramon Berserk	150 DD / 50 Real World Money	Your Digimon gains +4 damage on all attacks this round. They also take +2 damage from all attacks this round.
Digivolution Plug-In D	200 DD / 80 Real World Money	Reduce the Hope cost of your next digivolution attempt this session by 4.
Plugin-J	200 DD / 80 Real World Money	Your Digimon immediately restores 8 HP.
Garuru Cannon	200 DD	Your Digimon's next attack gains +3 to hit and the [RANGE 6] tag regardless of its normal tags.

Rare Cards

Card	Cost	Effect when slashed
Super Agumon Attack	Loot / Trade only	+2d6 bonus damage on your Digimon's next attack. Cannot be purchased.
Sukamon Slump	Loot / Trade only	One enemy within 6 spaces immediately gains the Confuse status. Cannot be purchased.

Card	Cost	Effect when slashed
Juggernaut	GM determined	Your Digimon's next attack deals maximum possible damage — no dice rolled. Cannot be purchased.
Blue Card	GM determined — story reward only	Your Digimon immediately digivolves one full stage above their current stage, even above the 2-stage maximum. No Hope cost to initiate. Normal Hope maintenance costs apply from the following turn. The Blue Card comes when the moment demands it. It cannot be stockpiled.

Food

Eating a meal costs no action and happens naturally during rest or downtime. Bonus effects last for the current session and do not stack with the same meal eaten twice.

Guilmon Bread

Type: Food Cost: 30 Real World Money / 90 DD Effect: Counts as a meal for both Tamer and Digimon. Prevents hunger. Restores 8 HP when eaten. Guilmon bakes this himself. It is somehow perfect anyway. Do not ask about the recipe.

Shaochung's Buns

Type: Food Cost: 20 Real World Money Effect: Counts as a meal for the Tamer. Prevents hunger. Grants +1 to all Friendship skill rolls for the current session. Made with affection and pressed into your hands whether you asked for them or not.

Ramen (Katsuya-Style)

Type: Food Cost: 40 Real World Money Effect: Counts as a meal for the Tamer. Prevents hunger. Grants +1 to all skill rolls for the current session and restores 6 HP. Kazu and Kenta ate this before, between, and after every crisis in the Digital World. It helps.

Digital World Berry Cluster

Type: Food Cost: 80 DD — Digital World foraging or vendors Effect: Counts as a meal for both Tamer and Digimon. Prevents hunger. Restores 5 Hope immediately when eaten. The berries grow in the brighter parts of the Digital World — the places that have not been touched by D-Reaper code.

Calumon's Crumbs

Type: Food Cost: Free — Calumon gives them occasionally Effect: Counts as a meal for both Tamer and Digimon. Prevents hunger. Both restore 5 HP. You cannot buy these. Calumon gives them to people he likes, which is most people. He does not understand why that is special. That is what makes it special.

Playtest Notes — v0.1

This is the first compiled draft of the Tamers Season 3 module. All values are playtest numbers and subject to change.

When playtesting track the following:

— Do the seven class trees feel distinct from each other? Ryo and Takato share the Courage entry requirement — does Ryo's dual-stat entry requirement create meaningful differentiation? — Is Biomerge used as a genuine desperation move or is the zero Hope cost so attractive that Tamers use it freely? — Is the DN 12 corruption check the right threshold? Does failure feel like a meaningful consequence or a game-ending punishment? — Does losing the Tamer as an independent actor for the rest of the encounter feel like a real cost? — Does the Card Slash system see regular use? Do Tamers feel the single-use cost is worth the immediate impact? — Is the Blue Card too powerful? Should it be Super Rare or GM-only? — Does Rika's Ruthless Efficiency feel too strong at +2 to all attacks for the rest of the encounter on a kill? — Does Jeri's Still Here feel impactful enough at its current trigger condition? — Is Kazu's Guardromon's Partner clear at the table — specifically that damage is not recalculated through new resistances? — Does Henry's The Hardest Kind of Strong see use, or does the no-attack condition make it too situational? — Are there obvious Season 3 items from the show still missing from this list? Report findings to the designer.

This document is a playtest draft. Numbers are subject to change after testing.
